

Two Pipe Reverse Return System

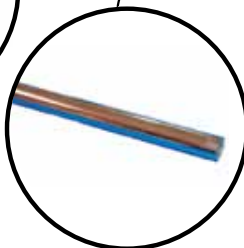

**PRODUCT CODE:**  
**VA-400405**  
Automatic bypass

**PRODUCT CODE:**  
**V-1773481C**  
Optional copper valves

**PRODUCT CODE:**  
**V-RSW8**  
To cover exposed pipe

**PRODUCT CODE:**  
**V-C16600**  
Chrome plated drop tube  
24" long

**PRODUCT CODE:**  
**VA-ST1773367C**  
Straight copper or  
chrome pipe valve set  
for towel warmer

The two pipe reverse return piping system has a supply and return that are equal in length and size. The first radiator supplied is the last radiator returned and vice versa. As flow requirements decrease the pipe diameter can also be decreased. This piping arrangement has a self balancing characteristic but the lock shield valves will guarantee accurate flow rate to each radiator. The modulating thermostatic valves will control each individual space for maximum comfort and efficiency. This information is intended as a guide only. Use competent qualified installers for pipe sizing and installation.
